## **SUBJECT:** Regulatory Branch Realignment

**DISCUSSION:** For a number of years, the Nashville District Regulatory Branch area of responsibility has been divided into Eastern and Western sections. The geographic area for each section was based primarily on watersheds and, in the Cumberland River basin, aligned with the Corps' Resource Managers' areas of responsibility. Although this arrangement has worked reasonably well, it has sometimes been difficult for the regulated community to determine whether an activity was located in the Eastern or Western area.

Effective May 1, 2007, the areas of responsibility for the Eastern and Western Sections have been realigned along county boundaries. We believe this action will improve efficiency and certainty for the regulated public.

The attached spreadsheet lists counties included in each section's area of responsibility. An (\*) indicates a county where jurisdiction is partly within Nashville District and partly within a neighboring Corps district(s).

**POINTS OF CONTACT:** A current listing of personnel can be found on the Nashville District Regulatory Branch website at [District Office Staff](#).
